2018 was the year of the Maple Leaf Lounge

Dec 01, 2018

Air Canada customers have new Maple Leaf Lounges to explore after the company opened its third lounge in 2018. Following the successful Maple Leaf Lounge unveilings of in Saskatoon in July and New York-LaGuardia in early December, St. John's International Airport became the latest airport where eligible customers can relax before their flight at an Air Canada Maple Leaf Lounge.

The Maple Leaf Lounges are truly a Canadian experience. They are conceived by Canadian designers, the artwork is produced by Canadian artists and finished with Canadian maple-wood screen walls and Canadian marble.

Have a look!
