Air Canada Customers Can Now Track their Baggage and Mobility Aids while Travelling in Canada

Progress of checked items available in real time on the Air Canada mobile app

Editors note: A video about the baggage tracking process is [available for download here](#).

MONTREAL, Dec. 1, 2023 /CNW/ - Air Canada today introduced a new feature to the Air Canada mobile app to enable customers traveling within Canada to track the progress of their baggage and mobility aid in real time at key points as it moves with them throughout their journey. The new tracking feature is designed to provide travellers with added confidence and improve the overall customer experience through greater convenience.

"At Air Canada, we know that apart from a safe, comfortable journey, the prompt delivery of baggage and mobility aids is a top priority for our customers. We already achieve a very high reliability rate, but to further elevate our service we are introducing a new tracking feature in the Air Canada mobile app to give customers real-time information, greater certainty about the movement of their belongings during their trip, and heightened convenience," said Tom Stevens, Vice President, Customer Experience and Operations Strategy at Air Canada.

Using the Air Canada mobile app, customers can now track their baggage and mobility aid as it travels with them on domestic flights, based on the same tag scanning information that Air Canada employees use at each stage to handle these items. Initially available to customers travelling within Canada during final development, the tracking feature will be expanded to the airline's U.S. flights next year and, over time, select international destinations.

- Air Canada mobile app users will be able to track the progress of their checked items at key points from check-in, through the airport handling processes, on to the aircraft and through connections and arrival, providing reassurance every step of the way.
- For customers required to check mobility aids, they will be able to track the movement of their aid, including to confirm, under Air Canada's enhanced accessibility protocols, that it is securely loaded before the aircraft departs.
- The tracker's "What's Next" feature tells customers the next step for their belongings, including information on where they need to pick up their bag, such as an airport baggage carousel number, either at a transfer point or the end of their journey.
- In those rare instances when baggage is delayed, in addition to existing text or email notifications, the app has the functionality to advise customers of delayed items and enable them to easily file a delayed baggage report from their smart phone and arrange delivery, which saves time waiting at the carousel or at a baggage assistance counter. Customers will receive a confirmation that the report is received with a file number and a link to follow-up on any updates.

The tracking feature is integrated into the Air Canada mobile app, which is the best way for customers to manage their travel. In addition to allowing customers to book travel and check-in, the app provides self-service capabilities, up-to-the-minute notifications on flight status and gate changes, airport maps, and other useful information. Customers can download the Air Canada mobile app at no cost from Apple's App Store or Google Play.

About Air Canada

Air Canada is Canada's largest airline, the country's flag carrier and a founding member of Star Alliance, the world's most comprehensive air transportation network. Air Canada provides scheduled service directly to more than 180 airports in Canada, the United States and Internationally on six continents. It holds a Four-Star ranking from Skytrax. AirCanada's Aeroplan program is Canada's premier travel loyalty program, where members can earn or redeem points on the world's largest airline partner network of 45 airlines, plus through an extensive range of merchandise, hotel and car rental partners. Its freight division, Air Canada Cargo, provides air freight lift and connectivity to hundreds of destinations across six continents using Air Canada's passenger and freighter aircraft. Air Canada aims to achieve an ambitious net zero emissions goal from all global operations by 2050. Air Canada shares are publicly traded on the TSX in Canada and the OCTQX in the US.
