Air Canada Cyber Statement

An unauthorized group briefly obtained limited access to an internal Air Canada system related to limited personal information of some employees and certain records. We can confirm that our flight operations systems and customer facing systems were not affected. No customer information was accessed. We have contacted parties whose information has been involved as appropriate, as well as the relevant authorities.

We can also confirm all our systems are fully operational. We have since implemented further enhancements to our security measures, including with the help of leading global cyber security experts, to prevent such incidents in the future as part of our ongoing commitment to maintaining the security of the data we hold.

We have no further public comment on this matter.
