Air Canada reports July traffic

MONTREAL, Aug. 6 /CNW Telbec/ - Air Canada reported a load factor for the mainline of 82.5 per cent in July 2007. The mainline carrier flew 1.3 per cent more revenue passenger miles (RPMs) in July 2007 than in July 2006, according to preliminary traffic figures. Capacity increased by 2.7 per cent, resulting in a load factor of 82.5 per cent, compared to 83.6 per cent in July 2006; a decrease of 1.1 percentage points.

Jazz, from which Air Canada purchases regional capacity, flew 8.5 per cent more RPMs in July 2007 than in July 2006, according to preliminary traffic figures. Capacity increased by 6.0 per cent, resulting in a load factor of 74.4 per cent, compared to 72.7 per cent in July 2006; an increase of 1.7 percentage points.

Year over year, system traffic on a consolidated basis for Air Canada and Jazz, rose 1.9 per cent on a capacity increase of 2.9 per cent, resulting in a load factor of 81.8 per cent; compared to 82.7 per cent in 2006; a decrease of 0.9 percentage points.

"On a combined basis with Jazz, system wide traffic increased almost 2 percentage points from the previous year as consumers continue to choose the new Air Canada in growing numbers for its innovative fare products, subscription passes and new cabin amenities as we renew the fleet," said Montie Brewer, President and Chief Executive Officer. "For the month of July, traffic continued to grow in all markets with the exception of the U.S. transborder market where we responded with effective capacity management that resulted in increased load factor year over year. The U.K. market showed some weakness due to increased industry capacity while travellers continue to be impacted by additional security measures and the doubling of the U.K departure tax. I am particularly proud of our employees who continue to earn the loyalty of our customers with the quality of their service, demonstrated by the fact we exceeded on-time performance and customer satisfaction objectives for the month. Indeed, it is our employees who were instrumental in Air Canada being voted for the second time in three years as the Best Carrier in North America in the world's largest passenger survey of over 14 million air travellers

NOTE: Beginning in May 2007, Air Canada has adjusted the way it reports its monthly traffic results. Tier 3 flying is now included in mainline results along with Jetz. Charter flying is apportioned among the respective market segments. The June 2006 and year-to-date traffic numbers have been adjusted to reflect these changes for year-over-year comparisons.
